

To make the text warp in the Porsche tutorial

Drag photo into new document in Adobe Illustrator

Create the text on its own layer

- Rt click to create outlines

- Group letters as words

- Drag words into location

Select words then pick

- Object – Envelope Distort—Make with Mesh

- Define mesh (usually 3x3)

Adjust the points by clicking off object, then use white direct select and click white dots and drag

To create wheel center use the asterick text * and then enlarge it

For wheels use ellipse tool and adjust the stroke to wide.

To color text you will select it, expand it under object and assign a color.
