

# Portfolio

A portfolio is a collection of your best work. Come up with at least six things. Hopefully more. Six is the minimum. Don't include more than 15. Be sure there is nothing wrong with any of the things that are in your portfolio.

Portfolios are used to get jobs, get into schools, or just have one place where your best work is stored.

Your very best design or photo should go first, and your second best, last. Sometimes if the first thing isn't good they won't look at anything else.

Sometimes a photographer will place a short bio of their photographic experience or write a brief statement about their perspective, inspiration or passion. This is totally optional and include only if you desire.

You should already have a portfolio page on your Weebly site. If you don't, make one.

It is up to you how you do this. If I was doing it, and I had a LOT of things I would do a gallery but it is up to you.

I wouldn't do a slide show if you have a lot of things. Employers like to go through things fast, they don't want to wait.

If you only have a few picture a slide show would be fine.

Be sure to upload your best photos as a file so I can print them off.
