

## Skate Video Music Montage.

You don't need a story line, but you do need the following:

1. Opening shot that fades in.
2. Title.
3. Video needs a music bed under it.
4. Slow motion incorporated into a shot.
5. A freeze frame with continuation of the action after the freeze.
6. Green screen the bicycle video to ride with the skater.
7. Closing shot needs to be appropriate as a closing shot.
8. Credit roll at the end.
9. Some shots need to fade into the next shot.

*As a montage your music will join your shots together. Still you need to choose the best shots and make them seem connected.*
